DISCLOSURES UNDER PILLAR-3 MARKET DISCIPLINE OF BASEL-III-CAPITAL REGULATIONS FOR THE QUARTER ENDED DECEMBER 31, 2020

Index	Parameter	Response
	Qualitative Disclosures	
A	A summary discussion of the bank's approach to assessing the adequacy of its capital to support current and future activities.	Bank is maintaining a healthy CRAR which is commensurate with the size of its operations. As on 31 st December 2020, Bank CRAR is 37.17%. The bank is well capitalized, given the risk exposure arising from its portfolio of assets. The bank assesses the long term requirement of capital through the Internal Capital Adequacy Assessment Process (ICAAP). The assessment of future capital duly considers the anticipated growth in the business as reflected in the budget document of the bank, stressed scenarios, regulatory/internal guidelines etc. As per the commitment of the management, the capital adequacy to support the current and future activities is monitored and assessed on regular basis. The CRAR is calculated on weekly rests and reported in Management Committee at monthly intervals.
	Quantitative disclosures	(Rs. in Crore)
В	 Capital requirements for credit risk: Portfolios subject to standardized approach Securitization exposures. 	104.39 Nil
C	Capital requirements for market risk: Standardized duration approach; Interest rate risk Foreign exchange risk (including gold) Equity risk	8.83 11.25 Nil
D	Capital requirements for operational risk: Basic indicator approach	8.83
E	 Total and Tier-I capital ratio: For the top consolidated group; and For significant bank subsidiaries (stand alone or sub- consolidated depending on how the Framework is applied). 	The bank is a single entity operating with two branches in India. Tier-I Capital Ratio 36.19% Total CRAR = 37.17%

TABLE DF - 2 - CAPITAL ADEQUACY

TABLE DF -3 - CREDIT RISK- GENERAL DISCLOSURES

A. <u>QUALITATIVE DISCLOSURES</u>

The general qualitative disclosure requirement with respect to credit risk, including;

a. <u>Definitions of past due and impaired (for accounting purposes);</u>

An asset, including a leased asset, becomes non-performing when it ceases to generate income for the bank.

INDIAN BRANCHES (INCORPORATED IN TAIWAN ROC WITH LIMITED LIABILITY)

A "Non Performing Asset" (NPA) is a loan or an advance where;

i) Interest and/or installment of principal remain overdue for a period of more than 90 days in respect of a Term Loan,

ii) The account remains 'out of order' for a period of more than 90 days as indicated hereunder, in respect of an Overdraft/Cash Credit (OD/CC),

iii) The bill remains overdue for a period of more than 90 days in the case of bills purchased and discounted,

iv) The installment of principal or interest thereon remains overdue for two crop seasons for short duration crops,

v) The installment of principal or interest thereon remains overdue for one crop season for long duration crops,

vi) The amount of liquidity facility remains outstanding for more than 90 days, in respect of a securitization transaction undertaken in terms of guidelines on securitization dated February 1, 2006.

vii) In respect of derivative transactions, the overdue receivables representing positive mark-to market value of a derivative contract, if these remain unpaid for a period of 90 days from the specified due date for payment.

Out of Order: - An account should be treated as 'out of order' if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power. In cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power, but there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not enough to cover the interest debited during the same period, these accounts should be treated as 'out of order'.

Overdue: - Any amount due to the bank under any credit facility is 'overdue' if it is not paid on the due date fixed by the bank.

b. Discussion of the bank's credit risk management policy;

Credit Risk is defined as a possibility that a bank's borrower or counterparty will fail to meet its obligations in accordance with agreed terms. This may happen due to inability or unwillingness of a customer or counter-party to meet commitments in relation to lending, trading, settlement and other financial transactions.

The process with regard to management of Credit Risk is summarized here below;

Identification of Credit Risk: - Credit Risk may arise in the course of lending or even in the case of investments done by bank. However with regard to the Bank, the potential of credit risk happening in investments is quite ignorable as the bank's investments fall in gilt securities with the sole purpose of maintaining Statutory Requirements.

As a part of credit risk management process, the bank identifies the credit risk at the time to its origination and through the process of continuous monitoring on an ongoing basis.

Measures for Risk Mitigation: - The bank has formulated the internal guidelines with due consideration to regulatory requirements and also the global guidelines issued by Head Office of the Bank. The guidelines prepared by the bank are reviewed and revised as and when warranted by circumstances. The guidelines prepared by the bank are independently vetted/reviewed by the Head Office and finally documented.

The guidelines, among others, stipulate the requirements to be fulfilled by the borrowers, required documentation process, the assessment of creditworthiness of the borrower, doing Credit Risk Assessment (CRA) etc. Apart from that, the Credit Risk Mitigation and Collateral Management aspects cover the verification and valuation of financial and non financial collaterals. Further, the aspects relating to tenure, valuation and title are examined wherever immovable

CTBC BANK CO., LTD. INDIAN BRANCHES (INCORPORATED IN TAIWAN ROC WITH LIMITED LIABILITY)

properties are taken as collateral. Detailed guidelines / instructions regarding valuation of fixed assets and insurance of stocks and other assets financed by the Bank as laid down in Credit Policy are in place.

Further, as a part of an ongoing process, the borrower accounts are monitored on periodic basis. Besides, the ALCO and Management Committee of the bank, on monthly rests, discuss the various aspects of credit risk and any deviations/observations, (in line with bank internal policy) are duly updated by credit department for review and member's approval. The process also involves taking approvals of Management Committee once the exposure limits exceed the internally fixed limits. Further, the results of stress testing are also presented and discussed in ALCO Further, Bank also review credit risk, Industry concentration and major industry portfolio analysis part in Risk Management Committee (RMC) on quarterly basis.

With regard to deteriorated credit assets, the credit department of the bank conducts periodic review meeting to take stock of status of legal actions, recovery efforts etc.

However the bank assumes the possibility of credit risk always being there due to the factors which may arise in the future being beyond the control of the counterparty. Such factors may primarily be the external factors specific to industry or economic shocks etc. and these are duly covered in the ICAAP document of the bank in order to have a prudent assessment of the capital adequacy.

B. <u>QUANTITATIVE DISCLOSURES</u>

	Particulars	(Rs. in Crore)
Α	Total gross credit risk exposures, Fund based and Non-fund based separately.	
	• Fund Based (FB)	1,258.42
	Non Fund Based (NFB)	158.87

TABLE DF – 4 - CREDIT RISK - DISCLOSURES FOR PORTFOLIOS SUBJECT TO STANDARDIZED APPROACH

Index	Parameter	Response	
	Qualitative Disclosures		
A	 For portfolios under the standardized approach: Names of credit rating agencies used, plus reasons for any changes; Types of exposure for which each agency is used; and A description of the process used to transfer public issue ratings onto comparable assets in the banking book; 	The bank has its internal credit rating mechanism. However due consideration is given to the external credit ratings obtained by the counterparty from the credit rating agencies recognized by the Reserve Bank of India.	
	Quantitative Disclosures	(Rs. in Crore)	
В	For exposure amounts after risk mitigation subject to the standardized approach, amount of a bank's outstanding (rated and unrated) in the following three major risk buckets as well as those that are deducted;		
	♦ Below 100 % risk weight	400.51	
	♦ 100 % risk weight	553.45	
	 More than 100 % risk weight 	89.98	
	♦ Deducted		
	♦ Total	1043.93	

INDIAN BRANCHES (INCORPORATED IN TAIWAN ROC WITH LIMITED LIABILITY)

	Table DF-18: Leverage ratio common disclosure template	
	Item	Leverage ratio framework (Rs. in million)
	On-balance sheet exposures	
1	On-balance sheet items (excluding derivatives and SFTs, but including collateral)	20260.94
2	(Asset amounts deducted in determining Basel III Tier 1 capital)	(78.13)
3	Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of lines 1 and 2)	20182.81
	Derivative exposures	
4	Replacement cost associated with all derivatives transactions (i.e. net of eligible cash variation margin)	256.54
5	Add-on amounts for PFE associated with all derivatives transactions	865.10
6	Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework	
7	(Deductions of receivables assets for cash variation margin provided in derivatives transactions)	
8	(Exempted CCP leg of client-cleared trade exposures)	
9	Adjusted effective notional amount of written credit derivatives	
10	(Adjusted effective notional offsets and add-on deductions for written credit derivatives)	
11	Total derivative exposures (sum of lines 4 to 10)	1121.64
	Securities financing transaction exposures	
12	Gross SFT assets (with no recognition of netting), after adjusting for sale accounting transactions	
13	(Netted amounts of cash payables and cash receivables of gross SFT assets)	
14	CCR exposure for SFT assets	
15	Agent transaction exposures	
16	Total securities financing transaction exposures (sum of lines 12 to 15)	
	Other off-balance sheet exposures	
17	Off-balance sheet exposure at gross notional amount	17727.09
18	(Adjustments for conversion to credit equivalent amounts)	(14992.73)
19	Off-balance sheet items (sum of lines 17 and 18)	2734.36
	Capital and total exposures	
20	Tier 1 capital	5085.51
21	Total exposures (sum of lines 3, 11, 16 and 19)	24038.81
